

How to calculate your car expenses

There are 2 methods you can choose from to calculate your deduction for car expenses.

Cents per kilometre method

If you use the cents per kilometre method, your claim is based on a set rate per kilometre.

You:

- can claim a maximum of 5,000km for work-related kilometres per car
- don't need receipts for your expenses (e.g., fuel receipts)
- do need a record to show how you calculate your work-related kilometres (e.g., using a diary or the [myDeductions](#) tool in the ATO app)
- need to be able to show that you own the car.

The cents per kilometre rate covers all car expenses including decline in value, registration and insurance, maintenance, repairs and fuel costs. You can't add these, or any other car expenses, on top of the rate when calculating your deduction.

Logbook method

The logbook method allows you to claim the work-related portion of your actual car expenses. Expenses you can claim include running costs such as fuel, oil and servicing, registration, insurance and the decline in value.

- ✘ **You can't claim** capital costs, such as the purchase price of your car, the principal of a loan to buy it, or any improvement costs (e.g. adding tinted windows).

You need records for all other car expenses, including evidence that you own the car and odometer readings at the start and end of the period you used the car during the year.

To work out your work-related use percentage, you need a valid logbook and the odometer readings for the start and end of the logbook period.

Your logbook:

- needs to show your work-related trips for a continuous 12-week period that represents your general pattern of work-related travel
 - needs to show the destination and purpose of every journey, the odometer reading at the start and end of each journey, and the total kilometres travelled
 - is valid for 5 years (unless your circumstances change – e.g., you change jobs)
 - can be a paper logbook, or can be kept electronically by using the [myDeductions](#) tool in the ATO app.
- i Tip:** if you're using the logbook method for 2 or more cars, you'll need to keep a separate logbook for each car. The logbooks must be kept for the same 12-week period.
- ✓ You can claim** fuel and oil costs, based on either actual receipts, or an estimate of the expenses using odometer records that show readings from the start and the end of the period you used the car during the income year.

If your car is a zero emissions electric car, you can choose to use the electric vehicle (EV) home charging rate set out in [PCG 2024/2 Electric vehicle home charging rate - calculating electricity costs when a vehicle is charged at an employee's or individual's home](#) and your odometer records to estimate your home charging expenses. You can't use this rate if your car is a plug-in hybrid electric vehicle.

Remember

A car is a motor vehicle that carries a load of less than 1 tonne and fewer than 9 passengers (including the driver). This includes electric (zero emission) and hybrid vehicles if they meet this definition. Motorcycles, trucks, minibuses, some utes and similar vehicles are not cars.

i This is a general summary only.
